

JET SPECIALTY, INC.

For 26 years Jet Specialty, Inc. has served the Oil & Gas Industry as a representative supply company providing quality valves and instrumentation products. Complementing this expertise, fabrication and measurement capabilities were added in 2001 to help serve the industry's growing production and measurement needs. Jet's fabrication of meter tubes and packaging services has continued to grow since it's founding with new facilities to streamline and expand production capacity. Fielding a team of over 130 industry professionals throughout Texas, Oklahoma and New Mexico, Jet Specialty is positioned to provide the service and support you need to get the job done.

Understanding your fabrication, measurement, and supply needs is what makes Jet Specialty one of the Oil & Gas Industry's fastest growing companies today. Our team of sales, service, fabrication and measurement specialist bring years of experience to assist you in design and fabrication of measurement equipment.

JET QUALITY

At Jet Specialty Quality is more than just a word, it's a commitment. Our fabrication personnel are trained, certified and dedicated to providing a fully documented product. Our welders are DOT certified and our processes have earned Certificates of Authorization from ASME, "U" Code Stamp and NBBI "R" Code Stamp for repair operations. On request, we can provide a complete set of engineering drawings, and required testing procedures performed during fabrication, as well as all documentation in electronic format.

JET BUILT & ENGINEERED

Jet offers a broad array of fabricated measurement products to help your company with all your installation needs.

Jet Fabricated Measurement Products

- Single and Dual Chamber Meter Tubes per the Latest AGA 3 / API 14.3 Specifications, Skid Mounted with or without an Enclosure.
- OFU – Orifice Flange Union Meter Tubes, Skid Mounted with or without an Enclosure.
- Skid Mounted Chromatograph Enclosures
- Vertical & Horizontal Production Separator Packages
