26 Years Ago Tom Darter had a vision for a new kind of oil field supply house. He envisioned a supply house that had warehouses in all **major Oil & Gas production regions** stocked with everything from valves to the latest measurement and instrumentation

products available. Part of the vision was to provide services and needed. Today Jet Specialty fulfills that vision with **14 warehouses** and pipe, to fabricated measurement and production equipment. customized **installation kits and on-site supply trailers.**

products the Oil & Gas companies stocked with everything from fittings Adding to this array of products are Understanding your supply, one of the Oil & Gas Industry's

fabrication and measurement needs is what makes Jet Specialty

fastest growing companies today. Jet fields a team of over 130 employees in its Supply, Fabrication & Measurement

facilities strategically customer service comes

located throughout Texas, Oklahoma and New Mexico that understand first. • Jet Specialty inventories & represents over **45 leading**

product lines to provide the

service and support you need to get the job done. • Our sales, service,

fabrication and measurement specialists bring years of experience to assist you in all your company's design and

overall delivery needs. Our fabrication personnel are

trained, certified and

dedicated to providing a fully documented

product. Our welders are

DOT certified and our processes

have earned Certificates of

Authorization from **ASME, U Code Stamp and NBBI "R" Code Stamp** of repair operations. We can provide engineered

drawings and complete test documents performed during product fabrication upon customer

request as well as in electronic format. **Quality more**

than just a word at Jet Specialty; it's a commitment.

Providing Supply Chain solutions that maximize your operating efficiency is our objective. The large number of Jet supply houses throughout the Oil Patch save time and money, but we can also customize a supply chain solution to meet your specific needs.

Our core competencies include helping our operators with:

- Onsite Inventory Management
- Customized Installation Kits that retain the specific parts to meet your equipment installation requirements
- Equipment Research and alternative product recommendation to improve quality while reducing cost
- Reducing inventory assets and increasing turns to minimize operating capital and increase profit

Our Supply Chain team stands ready to help custom tailor a program to meet the specific inventory challenges your operating company confronts. Contact your Jet representative to explore the possibilities.

JET

Customized Supply Chain Solutions, The Jet

Caddy: When you're at the job site you don't have time to chase down supplies. We at Jet understand the time limits you're up against, that's the reason why Jet has the Caddy. A mobile warehouse stocked with equipment per your site installation requirements. **When you need it and where you need it at all times.**

Your job simplified... Supplies on site is only part of the solution; we handle all the work, stocking, inventory, paperwork, and delivery. When the installation site is complete just give us a call and we'll pick up the caddy, or if you need more supplies we will continually restock the Caddy until your job is complete.

We'll go where you go... Our Jet Caddies are built to go where you go... Their steel frame and tandem wheels are designed to travel the oilfield roads to get the supplies you need to the job site. Built with plenty of interior space, the Caddy gives you room to work, in or out of the weather.

Standard Products Found in the Jet Caddy

- Pipe
- Pipe Dope
- Instruments
- Transducers
- Tubing
- Filters
- Pumps
